

ADLQ · DLQ

ADLQ / DLQ Ceiling Diffusers

TROX ceiling diffusers of the ADLQ · DLQ type in square design, produced in aluminium (ADLQ) or steel (DLQ), are suitable for installation flush with the ceiling. They are deployable in rooms of up to approx. 4 m in height.

The permissible supply air temperature stands at ± 10 K. These ceiling diffusers can be used for both supply air and exhaust air. The fixed blading means that these ceiling diffusers are suitable primarily for horizontal air flows. Specially developed attachment kits and plenum boxes provide for optimum air intake.

Product Description

TROX ceiling diffusers type ADLQ · DLQ in square design, produced in aluminium (ADLQ) or steel (DLQ), are suitable for installation flush with the ceiling. Available with plenum box for side entry air connection.
